

## Pedestrian priorities

- Do not overtake vehicles near the pedestrian crossing and adhere to the legal speed limit inside residential neighborhoods and in front of schools.
- Always give priority to pedestrians until they complete crossing the road.
- Do not overtake vehicles parked to drop off passengers.
- Taking care of the elderly and people with special needs and give them priority when crossing the road.
- Checking vehicles before moving and make sure the surrounding area is free of children or any other obstacles before moving.

If you're a driver...  
One moment please  
Remembering traffic rules is a civilized behavior

## Learn about protective driving to avoid traffic accidents

Protective driving: is taking precautions and preventive measures regardless of their causes

Qualities and advantages of the protective driver:

- Having high morals.
- Being calm and discipline.
- waiving his rights sportsmanly.
- The driver's compliance to take caution in all his actions during driving and good monitoring and attention to everything that is going on around him, in order to avoid accidents.
- Preserving the spirit of the laws and the rights of road users.

### Protective driving factors

**Monitoring:** Monitoring the movement of vehicles, pedestrians, motorcycles, animals or any other things that may compel you to slow down, stop abruptly, or change direction.

**Anticipation and prediction:** It is for the driver to anticipate the danger before it occurs and predict the worst-case scenarios.

**Decision Making:** The action taken by the driver trying to prevent an accident regardless of who is at fault.

**Application of the measure:** taking appropriate steps flexibly and calmly and according to the anticipated dangers to avoid any accident that may occur.
