The Role of the Drug Addicts Treatment Center in Training University Students and Participation in Awareness Programs:

- The center highlights its role and importance in the Jordanian arena in combating drug addiction. It collaborates with specialized treatment centers and partners with Jordanian universities to train students in related fields. The center is accredited by Jordanian universities for clinical training and is a requirement for obtaining a bachelor's degree, facilitating the students' tasks in preparing master's and doctoral theses.

Drug Addicts Treatment Center

Article (9), paragraph (F) of the Drugs and Psychotropic Substances Law No. 23 of 2016 states that no public right lawsuit shall be initiated against any person who uses drugs or psychotropic substances if they voluntarily submit themselves or are arrested by their relatives and referred to specialized centers for addiction treatment, provided they officially report to the Drug Control Department.

Establishment of the Drug Addicts Treatment Center

- At the end of 1993, the Drug Addicts Treatment Center, affiliated with the Anti-Narcotics Department in Jabal Al-Weibdeh, was established. It was the first specialized center in Jordan and the only one in the world affiliated with a police agency at that time. The center had a capacity of (18) beds and started its operations in 1994.
- In 2009, the center underwent significant developments, including the establishment of a new building in the Arjan region, which increased its capacity to (60) beds.
- In 2012, the center was inaugurated in its current, the facility, established in has a capacity of (170) beds and is equipped with the latest equipment and scientific methods for treatment.

Services Provided by the Treatment Center and Patient Admission Process:

- The center provides free treatment services for Jordanian drug addicts and offers treatment services for other nationalities in a confidential manner and in compliance with international human rights standards.
- The center admits patients regardless of nationality, whether the person is a Jordanian or of any other nationality, for free.
- Patients are admitted around the clock throughout the week to provide an opportunity for those seeking treatment to start their recovery journey.

Main Axes of the Treatment Process:

1. Detoxification Phase Medical and pharmaceutical treatment to help the patient reduce the symptoms associated with withdrawal from the substance.
2. Rehabilitation Phase Psychosocial therapy within the center to help patients rethink drug use and eliminate idle time during their stay.
3. Follow-up Care Continuously monitoring the patient after completing the treatment program to ensure adherence.
